

How To Use Quilt Namer GPT

AI for Quilt Naming

1. **Go to your App Store** and download the OpenAI/ChatGPT app on your phone. (You can also open a free account on your computer at openai.com.)
2. Now come back to this flyer. Use your phone's QR Reader to open the **Quilt Namer GPT**. Once you open the link, the GPT will be saved in your account.
3. In Quilt Namer GPT, click the **START** button.
4. The GPT will ask you a few easy questions about your quilt. **Type your answer** in the MESSAGE box, then hit the up arrow to enter. If a question is irrelevant to your quilt, say "no" and hit the up arrow (enter). Be as detailed as you want: **Pretend you're talking to another quilter, family member, or friend** who asked you about your quilt. The more emotion you give the GPT, the better the names!
5. After you answer all the questions, the GPT will suggest 20 **creative quilt names**. You can ask it to refine the names or **create more choices**. If you're not getting the *name vibe* you want, add more details or nuance, such as "Give me 5 more like #6, less like #17." You're in charge!!!
6. **Enjoy the Process!** Have fun, and don't worry about making mistakes—the GPT is very forgiving, and wants to help you brainstorm and be creative!

Note: You may have to close your keyboard to see questions

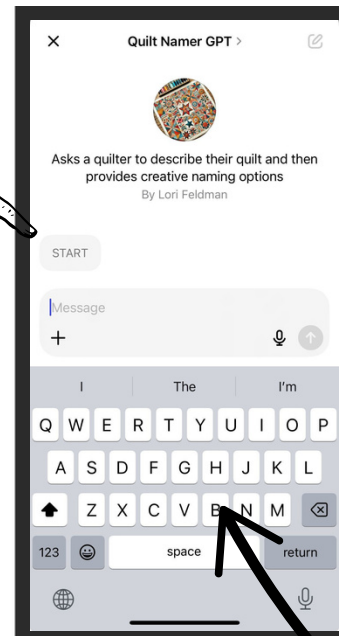

1

Download ChatGPT from your App Store (Apple or Android) - It's FREE! (Skip this if you have the app.)

2

Use your phone's QR code reader to open QUILT NAMER GPT in the ChatGPT app

3

In QuiltNamerGPT, click the **START** button and answer each question by typing in the MESSAGE box.
